

Resident Name: \_\_\_\_\_ Date of Visit: \_\_\_\_\_

## Visitor Agreement

The visitation rules listed below follow guidance from state and federal agencies to allow indoor and outdoor visitation for our residents in a safe manner. Please do not visit if you have any symptoms of COVID-19.

1. Screening of all who enter the facility for signs and symptoms of COVID-19 (e.g., temperature checks, questions about and observations of signs or symptoms), and denial of entry of those with signs or symptoms
2. Visitors, to include children, will screen each time they enter the facility. The sticker from the screening kiosk must be always worn by ALL visitors while inside the facility. Visitors will also need to sign out when leaving the facility.
3. Visitors must follow infection control practices listed below at all times while in the facility or during an outside visit:
  - Perform hand hygiene with an alcohol-based hand rub, before and after visitation.
  - **When county transmission rates are HIGH**, everyone, including children, must wear a mask covering both the mouth and nose for the entire visit and for indoor visits, wear a facility-provided surgical mask covering both the mouth and nose. NOTE: Exceptions may be made based upon resident choice or needs.
  - Children visitors must remain with their guardian who will be responsible for assuring that all safety measures are followed.
  - Visitors must stay in the designated outdoor/indoor visit location and are not allowed to visit any other resident(s) or roam the hallways.
  - Social distancing of at least six feet must be maintained from other residents and staff. May have close contact with the resident you are visiting based upon resident preferences or needs.
4. While not recommended, residents who are on transmission-based precautions (TBP) or quarantine can still receive visitors. In these cases, visits will occur in the resident's room and the resident will wear a well-fitting facemask (if tolerated). Please be advised that there is a higher risk of COVID and by visiting you are assuming that risk. Must wear full PPE (N95 mask, face shield, gown and gloves) at all times during your visit, remain socially distanced at least six feet from the resident, and maintain hand hygiene.
5. Visitors are to always remain in the designated visiting space during the visit. If assistance is needed, staff should be alerted by using the call bell or by calling the facility main number if visiting outdoors or in a common area. Please do not approach the nurse's station.
6. Any visitor who develops a diagnosis of COVID-19 or signs and symptoms within 10 days of visiting a resident must immediately notify the facility administrator of the date they were visiting and the resident they were in contact with.

I have read the above visitation requirements and agree to comply with all regardless of my past COVID-19 status and/or vaccination status. I understand that if I do not comply, I will be asked to leave and may not be permitted to visit in the future, except for compassionate care situations (e.g., end of life). Facilities have discretion to alter visitation practices based on disease transmission in the facility or community, visitor non-compliance, or other factors. **NOTE: No need to sign this document if screening process was completed with the kiosk.**
